**Subject:** Disciplinary Action Needed

Dear Sirs/Madams,

Microsoft needs some harsh disciplinary action brought against it. You backed off on the punishment and look at the immediate result, they've practically copied Apple Computer's "Mac OS X" with "Office XP", not only by naming the system software in an almost identical manner to confuse consumers, but also by the "look and feel" of the system software.

They practically copied Netscape with their Internet Explorer and essentially put that company out of business and the government stood by and did nothing, so Microsoft is seeing how far they can push the line again - don't let them get off scott free.

Thank You!!!
